

# Nicobar needs us.

Approximately 8.5 lakh trees in pristine rain forests will be cleared in the Nicobar Islands to make way for a 'developmental' project. It is home to 648 species of flora and 330 species of fauna, including rare and endemic ones like the Nicobar wild pig, Nicobar tree shrew, the Great Nicobar crested serpent eagle, Nicobar paradise flycatcher and many others.

## Cost of the Nicobar project

\$9.2 billion

\$9.2 billion equals INR 72,000 crores  
\$1.6 trillion equals INR 128 lakh crores

## Natural wealth wiped out

\$1.6 trillion\*

\*The estimated worth of one tree is about \$1,932,500 if left alone for 50 years. This number excludes the value from fruits, lumber and other services.

The Nicobar Project will end up destroying the habitats of Vast diversity of FLORA AND FAUNA

# MATH DOESN'T MATCH FOR GREAT NICOBAR ISLAND PROJECT

APPROXIMATELY \$118 MILLION OF COMPENSATORY AFFORESTATION  
 $\neq$  \$1.6 TRILLION DEFORESTATION

As stated by Professor T. M. Das, trees are worth around \$193250, including its worth of oxygen generation, control of air pollution and soil erosion, home to animals, and recycling of water. The Holistic Development of Great Nicobar Island Project will cut around 8.5 lakh trees. The compensatory afforestation allotted for the project does not even equal the amount of degradation the project will cause on the island. Along with that, the project will also spell trouble to its several wildlife and tribes.

\$118 MILLION = ~RS. 970 CRORE

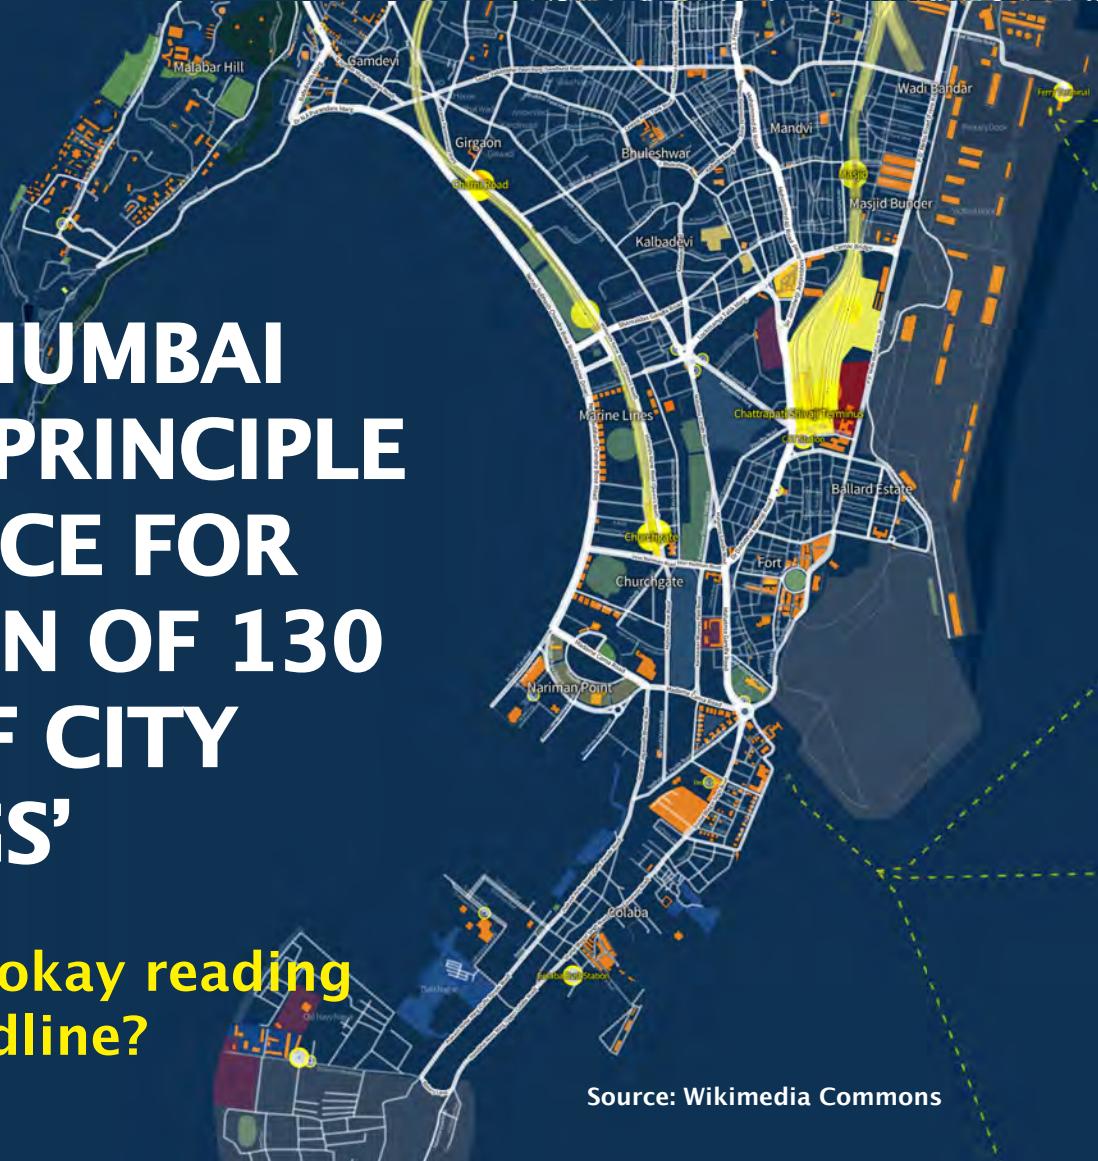

\$1.6 TRILLION = ~RS. 128 LAKH CRORE

# 'SOUTH MUMBAI GETS IN-PRINCIPLE CLEARANCE FOR DIVERSION OF 130 SQ KM OF CITY BUILDINGS'

Would you be okay reading this news headline?

Source: Wikimedia Commons

About 648 species of flora and 330 species of fauna, including rare and endemic ones like the Nicobar wild pig, Nicobar tree shrew, the Great Nicobar crested serpent eagle, the Nicobar megapode and many others will lose their habitats with the upcoming developmental project at the Great Nicobar Island.

Would you be okay if this happened to your habitat?

Nicobar Megapode  
*last seen at Great Nicobar Island*

Hey, we are starting construction of the new port at Great Nicobar soon. Hope you're ready to move in to the place we have for you

See you in mainland India!

Please reconsider the developmental project.  
We're really doing fine here.

My friends and I need this space.  
Please don't do this! 😢

Are you there? 🤔🤔

????

A large speech bubble on the right side contains the following text:

**Forest diversion means forest loss. Period.**  
Pristine habitats of rare flora and fauna on the island will be destroyed forever if the port developmental project is executed.  
A Nicobar species cannot survive in mainland India. Period.
