

Alphabet Conservation

Dr. Sanju Paul is a veterinary doctor in Himachal Pradesh, and an animal welfare advocate. She is also a wordsmith. Sanju wrote the poem about troubled and troubling monkeys which was charmingly turned into a rap poem that appeared in the Monkey Manners booklet of ZOO. Sanju has assembled some alphabet conservation items including one very flattering one about Zoo Outreach Organisation. We are proud to include these here. This would make a very educational game to play with older children in fact. One could assign students different words and ask them to make these alphabet thinggies with each word being a word relevant to conservation and wildlife. You could make a whole "forest" of these items using different animal names, such as

Decline	Trees	Habitat
Earth	Insight	Animal
Ecosystem	Ground	Bear
Resources	Eagle	Insect
	Reintroduction	Toad
		Ark
		Trek

Sanju's are much better. They mean something See here:
